I am a Senior Research Scientist of Computer Vision, leading the multi-modality learning team in Huawei Noah's Ark lab in London. I worked before in deep metric learning, self and semi-supervised learning, open-world and long-tail detection, active learning, and generative models (GANs and diffusion models). Currently I am focused on researching new models in multi-modality learning (visual LLMs). I frequently publish in top tier vision (CVPR, ICCV, ECCV) and ML conferences (NeurIPS, ICML, AAAI). ***h-index: 14, citations: 924.***
